INTERNSHIP REPORT

ON

ARTIFICIAL INTELLIGENCE INTERNSHIP

Submitted by

SAHIL SINGH

Roll Number: 25SCS1003003669

Programme: B.Tech CSE

Internship Designation: Artificial Intelligence Intern

Organization: Codec Technologies Pvt. Ltd.

Mode: Pan India, Hybrid

Internship Period: 19/06/2026 to 19/07/2026

Academic Session: 2026–27

CERTIFICATE

This is to certify that the internship report titled “ARTIFICIAL INTELLIGENCE INTERNSHIP” has been prepared by Sahil Singh, Roll Number 25SCS1003003669, as an academic record of the internship experience with Codec Technologies Pvt. Ltd. The internship certificate confirms completion of the 1 Month AICTE & ICAC Approved internship program as an Artificial Intelligence Intern, conducted from 19/06/2026 to 19/07/2026.

Particular	Details
Student Name	SAHIL SINGH
Roll Number	25SCS1003003669
Designation	Artificial Intelligence Intern
Organization	Codec Technologies Pvt. Ltd.
Duration	19/06/2026 to 19/07/2026

Authorized / Faculty Signature: _____

Date: _____

CANDIDATE'S DECLARATION

I, Sahil Singh, hereby declare that this internship report titled “ARTIFICIAL INTELLIGENCE INTERNSHIP” has been prepared for academic purposes based on the internship offer letter and internship certificate supplied for the program. The report presents the internship details, organization profile, objectives, scope, learning areas, methodology, and outcomes in a structured academic format.

Signature: _____

Student Name: SAHIL SINGH

Roll No.: 25SCS1003003669

Signature: Sahil Singh

ACKNOWLEDGEMENT

I express my sincere gratitude to Codec Technologies Pvt. Ltd. for providing the opportunity to undertake an internship as an Artificial Intelligence Intern. The internship program provided an opportunity to gain industry-level knowledge and valuable professional skills.

I am thankful to the university faculty, internship coordinators, project supervisors, and everyone who supported and guided me during the internship period. I also acknowledge the assigned projects and training tasks, weekly performance reviews, and professional exposure described in the internship offer letter.

Signature: Sahil Singh

1. INTERNSHIP OVERVIEW

Particular	Details
Organization	Codec Technologies Pvt. Ltd.
Designation	Artificial Intelligence Intern
Location & Mode	Pan India, Hybrid
Duration	19/06/2026 to 19/07/2026
Reporting	Assigned Project Head(s)
Program	1 Month AICTE & ICAC Approved internship program

The internship offer letter identifies the role as Artificial Intelligence Intern, with Pan India/Hybrid mode, a duration from 19/06/2026 to 19/07/2026, and reporting to assigned project head(s). The program required completion of assigned projects and training tasks on the organization's platform and via email.

Program Structure

- Industry-oriented learning and practical exposure.
- Assigned projects and training tasks.
- Weekly performance reviews conducted by the project supervisor.
- Possible scholarship consideration for exceptional interns based on weekly performance.

2. ORGANIZATION PROFILE

Codec Technologies is described in the offer letter as a global platform dedicated to empowering learners and connecting diverse talent to create meaningful career opportunities worldwide.

The offer letter further states that Codec Technologies delivers dedicated IT and business consultancy services across 27+ countries, supporting global innovation and strategic growth.

The internship program is presented as an immersive experience intended to provide industry-level knowledge and valuable skills through practical assignments and training activities.

Professional Environment

- Pan India, hybrid mode of internship.
- Reporting to assigned project head(s).
- Project and training activities through the organization's platform and email.
- Weekly performance reviews conducted by the project supervisor.

3. INTERNSHIP OBJECTIVES

- To understand the practical relevance of Artificial Intelligence in an industry-oriented environment.
- To gain exposure through assigned AI-related projects and training tasks.
- To develop structured problem-solving and analytical thinking skills.
- To understand how AI tasks can be approached through data, models, evaluation, and iteration.
- To improve technical communication and professional discipline.
- To connect academic Computer Science learning with professional AI practice.

4. SCOPE OF THE INTERNSHIP

The supplied offer letter and internship certificate establish the internship domain and designation as Artificial Intelligence Intern. They do not specify individual programming languages, frameworks, machine-learning libraries, datasets, model architectures, or named client projects. Accordingly, this report describes the technical scope at a general AI-learning and professional level rather than claiming use of a particular technology stack.

Scope Boundaries

- Artificial Intelligence internship and related assigned activities.
- Project-based and training-based learning.
- Professional communication through platform and email.
- Evaluation through project-supervisor reviews.
- General exposure to AI concepts and structured problem solving.

5. ARTIFICIAL INTELLIGENCE LEARNING AREAS

Because the supplied documents do not identify a specific AI technology stack, the following areas are presented as general learning domains relevant to the Artificial Intelligence internship rather than as claims about a particular proprietary implementation.

- Understanding AI problem statements and defining expected outcomes.
- Data-oriented thinking: understanding inputs, outputs, patterns, and the importance of data quality.
- Model-oriented thinking: considering how an AI system can learn or support decisions from available information.
- Evaluation: checking whether outputs satisfy the task objective and identifying errors or areas for improvement.
- Iteration: refining an approach based on observations and feedback.
- Documentation and communication of methods, observations, learning, and outcomes.

Responsible AI Practice

Professional AI work requires attention to data quality, correctness, evaluation, transparency, responsible handling of information, and awareness of limitations. This report does not attribute any specific model, dataset, framework, or algorithm to the internship because those details are not stated in the supplied documents.

6. METHODOLOGY

Stage	Description
1. Problem Understanding	Identify the objective, expected output, constraints, and task instructions.
2. Data / Input Understanding	Review available inputs and determine what information is relevant to the task.
3. Approach Planning	Break the AI task into manageable steps and select an appropriate conceptual approach.
4. Development / Training	Complete assigned project or training activities according to instructions.
5. Testing and Evaluation	Review outputs, identify errors, and assess performance against the task objective.
6. Review & Documentation	Use supervisor feedback and record approach, observations, learning, and outcomes.

This methodology is a structured representation of an AI internship learning process. It is not presented as the architecture of a specific proprietary project because the supplied offer letter and certificate do not provide project architecture or implementation details.

7. CONCEPTUAL ARTIFICIAL INTELLIGENCE WORKFLOW

Problem Definition → Data / Inputs → Approach → Development / Training → Evaluation → Review → Documentation

The workflow above provides a conceptual view of how an Artificial Intelligence task can be approached during an industry internship. It emphasizes clear problem definition, understanding inputs, structured development, evaluation, feedback, and documentation.

Professional Practices

- Define the problem before choosing an approach.
- Understand the quality and relevance of available inputs.
- Evaluate results using suitable task objectives and observations.
- Use feedback to improve the approach.
- Document assumptions, limitations, results, and learning.

8. EXPECTED OUTCOMES AND LEARNING

- Better understanding of Artificial Intelligence as an applied area of Computer Science.
- Improved ability to break AI-related tasks into logical stages.
- Greater awareness of data, evaluation, iteration, and documentation.
- Improved analytical thinking and problem-solving skills.
- Improved professional communication and reporting skills.
- Exposure to an industry-oriented hybrid internship environment.

Professional Development

The internship structure described in the offer letter supports learning through assigned projects and training tasks, interaction with project supervisors, and weekly performance reviews. Such a structure encourages discipline, continuous improvement, analytical thinking, and the ability to communicate technical work clearly.

9. CONCLUSION

The Artificial Intelligence internship at Codec Technologies Pvt. Ltd. provided an opportunity for structured learning and professional exposure. The supplied documents confirm the Artificial Intelligence Intern designation, Pan India/Hybrid mode, assigned project-head reporting structure, and the one-month internship conducted from 19/06/2026 to 19/07/2026.

The internship can be viewed as a bridge between academic Computer Science study and professional AI practice, particularly through assigned projects, training tasks, structured evaluation, supervisor feedback, professional communication, and documentation. The report intentionally avoids claiming specific AI models, frameworks, datasets, or proprietary project details that are not present in the supplied documents.
